

Framing Improvements (@id matching)

```
{  
  "@context": {"ex": "http://example.org/"},  
  "@id": ["ex:Sub1", "ex:Sub2"]  
}
```

```
{  
  "@context": {  
    "@base": "http://example.org/",  
    "@vocab": "http://example.org/vocab#",  
    "@version": 1.1  
  },  
  "characters": {  
    "format": {  
      "char": {  
        "@id": {},  
        "states": {  
          "@default": {}  
        }  
      }  
    }  
  }  
}
```

- Selects any node with the selected identifier (or wildcard {})..

Framing Improvements (@included)

```
{
  "@context": {
    "@version": 1.1,
    "@vocab": "http://example.org/"
  },
  "@requireAll": true,
  "foo": "bar",
  "prop": "value",
  "@included": [{
    "@requireAll": true,
    "foo": "bar",
    "prop": "value2"
  }]
}
```

- For adding nodes without a direct property relationship.
