JSON-LD 1.1 Timeline

- All work being done in Community Group [5][6].

- With enough interest, a Working Group could be spun up to create a Recommendation, and possibly address additional requirements.

- Expect community drafts to complete in Q1 2018.

  - Ruby implementation conforms to all changes in CG specs.

    - Live at Ruby RDF Distiller [7].

  - Changes likely easily applied to Python, Javascript, PHP, Java, C#, Go and other implementations.

  - Still no publicly available implementation in "C".

Road to Rec

- CG can release a "Final Report"

- People want Recommendations

- We need a road to release an updated JSON-LD as a Recommendation

  - Spin up Working Group

- Suggestions?
